Relentlessly Improving Lives, In Every Degree.

This class is geared toward HVAC mechanicals who have techs that typically work on HVAC and not refrigeration. This is also an excellent opportunity for those who are newer in the trade and want to know more!

This class will provide resources and minor trouble shooting procedures, bolster confidence and allow the participant to successfully take part in higher level training in the future.

TOPICS DISCUSSED

- A brief look at the refrigeration cycle in medium and low temp applications
- A focused look at the components which are different from air conditioning
- A look at controls, both conventional and electronic including defrost modes Air, Electric and briefly Hot Gas
- Installation practices and guidelines
- A brief look at the coming A2L regulations for refrigeration
